A LETTER FROM VICE PRESIDENT JUAN DE PABLO

It is my great pleasure to take on the role of Vice President for National Laboratories, Science Strategy, Innovation, and Global Initiatives. As someone who has always considered international collaboration a key aspect of my own work, it is a privilege to be able to facilitate that same experience for my colleagues at the University of Chicago and pave the way for a more seamless international experience across all regions, disciplines, and career stages.

I am particularly appreciative of President Zimmer’s global vision and the physical and reputational presence that the University of Chicago has developed around the world during his tenure. Through President Zimmer’s leadership, global work has remained a distinctive feature of the University’s approach to scholarly pursuits, and much progress has been made in increasing the University’s activities and visibility abroad. I am also grateful to Bala Srinivasan, now Senior Advisor to the President, who helped bring the University’s engagement in Asia to its current level, building up an array of exciting new programs in Chicago and at the Global Centers. I am fortunate to join a UChicago Global team whose deep expertise and knowledge of international partnerships spans and connects crucial areas of support for international research.

Moving forward, we will seek to expand into new regions, and to more deeply integrate growing efforts in innovation and entrepreneurship and alumni relations. I look forward to building upon the excellent platform that others have built before us and using the coming years to amplify the University of Chicago’s global influence. In that effort, I hope to rely heavily on the team that is in place in Chicago and at the Global Centers, as well as the faculty leadership for each region.

The COVID-19 pandemic has given us an unexpected opportunity to reflect and think strategically about how the University ought to proceed with its global endeavors. While the pandemic has temporarily eliminated travel, it has reinforced the strength of our existing connections and demonstrated that our partnerships extend well beyond physical presence. In diving deeper into virtual options for connecting, we have uncovered new opportunities for collaboration across the University and beyond. These links will outline the pandemic and will continue to enrich the offerings available to our faculty, staff, and students interested in international engagement. Virtual engagement will not disappear with the reemergence of physical travel, and we have established strong models and platforms for staying connected that will allow us to strengthen the University’s global activities and expand our ability to nurture vibrant partnerships.

This is also an important moment to reexamine the University of Chicago’s global scope and presence. Our Global Centers in Beijing, Delhi, Paris, and Hong Kong are a resource to the whole University, and make it extraordinarily easy to extend the University’s intellectual life abroad. While there have been many other locations where our faculty already are or would like to be engaged in research, partnerships, training, recruitment, and other academic and educational pursuits. We intend to build on these existing partnerships but also broaden the base of support for the University’s global work well beyond Asia and Europe.

Finally, in my role as Vice President for National Laboratories, Science Strategy, Innovation, and Global Initiatives, it is essential to me that we continue the initiative to integrate the arts, the humanities, the sciences, the National Laboratories, and the University’s entrepreneurial activities much more closely with its global work and strategy. This more forward-looking view will allow us to embark on larger-scale ventures that leverage the University’s significant resources in all of these areas in a coordinated manner.

Many of humanity’s greatest challenges - health, poverty, urban development, climate change, and renewable energy, among others - are fundamentally global in nature. They manifest themselves in unique ways around the world and require that forward-looking individuals and organizations from each nation come together. It is crucial that we maintain a global mindset as we seek to amplify the University of Chicago’s impact, with the ultimate goal of allowing our own experts to contribute to these important human questions.

In the years to come, we will be able to capitalize on the strengths we have built over the past decade and ensure that the University of Chicago’s contributions to this crucial international work continue.

Juan de Pablo

**ACTIVATE & ENERGIZE PARTNERSHIPS**

By activating new partnerships and energizing existing relationships, UChicago Global ensures that faculty have the connections and resources they need to continue their groundbreaking work.

**Funding Opportunities**

The Provost’s Global Faculty Awards funding opportunity, now entering its eleventh year, seeds and enhances lasting collaborative relationships between University of Chicago faculty and their colleagues around the world. Funding is currently available for faculty working in mainland China, Hong Kong and East Asia, India and South Asia, and Latin America. The Center in Paris also administers a separate process for faculty collaborations with partners in France.

In the FY20 funding cycle, 88 applications were received across all four regions administered by UChicago Global, 31% of whom were first-time applicants. 67 proposals were either partially or fully funded. While unexpected disruptions arose throughout the year, starting first with protests in Hong Kong followed by the impact of COVID-19 across all regions, all faculty recipients who were able to complete their projects reported overwhelmingly successful outcomes, with 70% intending to continue with the initiatives and relationships formed. Those who were not able to complete their projects due to external circumstances have worked closely with Global staff to adapt activities to the current context.

**Distribution of PGFA applications for FY20 across units**

UChicago Global’s newest funding opportunity, the Yuen Research Grants, provides University of Chicago faculty with resources to engage collaborators in Hong Kong and the Greater Bay Area on advanced research initiatives. // See a full list of faculty projects funded by UChicago Global in FY20

$1.4M

distributed in internal funding for international faculty activities

Delegations & Visitors

UChicago Global frequently hosts visitors to the University campus from the University’s international peer institutions. These visits range in purpose from courtesy or official visits, administrative learning visits, to groups hoping to identify academic partnership opportunities with UChicago faculty. In FY20, UChicago Global hosted 25 campus visits, engaging over 200 individuals from both UChicago and the visiting institutions. Highlights included visits from Manipal Academy of Higher Education, the Indonesian Ministry of Research, Technology, and Higher Education, Peking University’s Graduate School of Education, and the new director of CNRS for the Americas. Since the Global team transitioned to remote work, the team has worked to develop a framework for “virtual visits” with counterparts at peer institutions.

**Building better partnerships**

The creation, reporting, and recordkeeping of Memoranda of Understanding (MOUs) transitioned to the UChicago Global office in January 2019. These documents include: non-binding MOUs on the University of Chicago template, student exchange agreements, joint educational programming (non-credit bearing), and joint institutional initiatives.

UChicago Global’s process coordinates with the international institute, any UChicago faculty members involved, the Office of Legal Counsel, and URA to drive the development of the agreement. In addition, Global monitors relevant federal reporting requirements for each agreement and proactively follows up on potential renewals.

**WHAT MAKES A GOOD PARTNER?**

In early 2020, UChicago Global compiled insights from its experiences gained from its support of institutional and individual partnerships across all units and regions to develop a guide and series of success stories identifying best practices and potential pitfalls to avoiding when partnering with peer institutions.

// Read the guide: “What Makes a Good Institutional Partner?”

**Paris Science Lettres & CNRS**

In November 2019, President Zimmer visited Paris to sign two historic five-year agreements with major French research institutions: the French National Center for Scientific Research (CNRS), an interdisciplinary public research organization under the auspices of the French Ministry of Higher Education and Research, and Université Paris Sciences & Lettres (PSL), an umbrella organization for many of France’s top higher education and research institutions.

The CNRS agreement established a five-year commitment to research collaboration aimed at increasing opportunities for research and scholarly engagement between the two institutions, funding up to five new research collaborations per year selected from a pool of applicants by a bi-national review committee. Now in its second year, the CNRS-UChicago Research Partnership currently supports 11 unique three-year collaborations across an array of disciplines—including molecular engineering, physics, computer science, mathematics, biochemistry, genetics, molecular biology, social sciences, and digital humanities.

The PSL agreement established a five-year commitment to developing new joint research and training projects between the two institutions, as well as implementing student mobility and university staff exchange programs. This new agreement is based on a long-lasting collaboration between certain PSL members, including the École Normale Supérieure, the Université Paris-Dauphine (both PSL component schools), and the Collège de France (a PSL associate member).

**CHARACTERISTICS OF A GOOD PARTNER**

1. Subscribes to UChicago’s mission of rigorous academic inquiry.
2. Shares a common long-term vision with UChicago.
3. Focuses on targeted areas where an agreement is mutually beneficial.
4. Has clear goals in mind for the proposed collaboration.
5. Looks for a balanced relationship and an agreed-upon win-win construct.
Global Partners Network

During FY20, the Global Partners Network, an association of UChicago staff members focused on the expansion and development of international related activities, worked to combine expertise and strengthen ties across campus by developing voluntary working groups to develop three collectively chosen projects. This year’s projects included (1) combining resources and information regarding summer session programming across units; (2) maximizing the impact of international faculty and leadership travel; and (3) sharing best practices around international research collaborations and partnership agreements. In FY21, potential working group projects include sharing best practices on hiring abroad, international funding transfers, and other topics to be determined by the GPN network.

Building a database of international engagement

During FY20, UChicago Global significantly expanded its relationship management database to better capture the University’s internationally-focused activities both abroad and in Chicago. The newly-expanded database records faculty interests and ongoing research, institutional partnerships, funding opportunities, events, opportunities, and more, allowing UChicago Global to provide a bird’s-eye view of activities and areas of convergence across units and regions while ensuring that best practices (including those related to compliance and risk) are communicated to all faculty and staff supporting the University’s international work.

Global Directory & Regions Pages

In Spring 2019, UChicago Global relaunched its website (global.uchicago.edu), which serves as an interactive portal to the University’s international research and programming. The relaunched site is equipped with a new Global Directory features over 300 faculty and center profiles, highlighting their global activities, linking directly to their work, and making them easier to filter by unit, region, and area of study.

Additionally, our new Regions pages also offer direct links to current research, partnerships, news, faculty that occur across the many divisions, schools, and laboratories. Since its relaunch, Global’s online audience has increased by 230% with many new interactive features to come.

Events & Web Series

UChicago Global hosted a variety of events and webinars in FY20, with wide-ranging goals including featuring our faculty members’ work to external audiences, student pipeline creation, networking opportunities for faculty, and highlighting relationships with key institutions.

SCI-ROI 2019

September 6-8, 2019

The 2019 SCI-ROI Annual Event, hosted at UChicago in partnership with WinStep Forward, convened over 30 prestigious speakers and delegates from India interested in connecting with UChicago colleagues and recruiting from the significant pool of Indian graduate and postdoctoral talent in science and technology in the Midwest.

CONSULAR CORPS RECEIPTION

January 9, 2020

The purpose of the Consular Corps Reception is to solidify the already existing relationships between the University of Chicago and the Consular Corps, a group of consulates-general and honorary consulates based in Chicago. The 5th annual reception was held on January 9, 2020, and focused on UChicago’s commitment to excellence in rigorous social work and social welfare research with a brief panel discussion on Social Service Administration moderated by Dean Deborah Gorman-Smith with Professors Robert Chaskin, Zhiying Ma, and Alan Zarychta. The event welcomed 24 consuls general, 16 of whom attended for the first time.

YUEN LECTURE SERIES: 100 YEAR LIVES IN ASIA

April 30-July 30, 2020

The Yuen Campus in Hong Kong launched the 100 Year Lives in Asia (100YLA) virtual lecture series, chaired by Professor Kathleen Cagney (Sociology), to address the changing needs people and their families have as they prepare to live longer lives. Experts from Asia and the U.S. were invited to discuss the phenomenon, implications, challenges and opportunities for an aging population in Asia.

US-CHINA FORUM 2020: THE MATTER OF ART

February 6, 2020

The fifth US-China Forum was hosted at UChicago as part of the University’s ongoing partnership with the China-United States Exchange Foundation. This year’s Forum, titled “The Matter of Art,” was convened by UChicago Arts and UChicago Global in coordination with the Smart Museum of Art’s new exhibit The Art of Matter, curated by Professor Wu Hung (Art History).

PKU-CHICAGO SYMPOSIUM JOINT LECTURE SERIES

June 11, 2020-ongoing

Peking University, in partnership with UChicago, launched a joint lecture series in Summer 2020 which brings together experts from both institutions to share their insights and to discuss a broad range of topics exploring the breadth of our intellectual ecosystems. The success of the initial episodes of the series prompted four faculty-led spin-off series focused on field-specific topics including chemistry and economics, with several series still ongoing as of October 2020 and over two thousand attendees engaged.

Center in Delhi Fifth Anniversary Celebration

October 31-November 2, 2019

The University celebrated the fifth anniversary of its Center in Delhi, recognizing the many academic collaborations and partnerships that have been established in the region since its opening. Leading UChicago faculty engaged in public conversations with Indian colleagues. The celebration also included an unveiling of the skull cast of the Rajasaurus narmadensis, the first fossil remains of a dinosaur found in India, discovered by Professor Paul Sereno.

CAPTURE & DISSEMINATE KNOWLEDGE

11,539 event attendees across Chicago, the Centers in Beijing and Delhi, and the Yuen Campus in Hong Kong
Global Center Updates

CENTER IN BEIJING

The Center in Beijing will celebrate its tenth anniversary with a month-long series of virtual events in January 2021. Over the past decade, the Center has played a pivotal role in the University’s diverse academic engagements in China. Over these years, its presence has helped establish and nurture deep relationships with leading peer institutions in mainland China, as well as facilitating a wide range of individual faculty research. As it enters its second decade, the Center in Beijing will continue to work closely with its counterparts in Hong Kong and Delhi to provide a unified network of resources for the UChicago community across Asia, while simultaneously growing its unique ability to provide support for issues distinctive to the University’s work in China.

Although the Center in Beijing’s physical facilities were closed for most of 2020 due to COVID, during the first half of the fiscal year the Center was host to 22 study abroad students in the Beijing East Asia Civilizations program; three faculty-led summer student trips; 12 graduate student research residents; 17 faculty-led academic workshops and conferences, 3 alumni events, and 13 public events (including the launch of 2 art exhibitions in the Steven Sun Gallery. A collection of works by Wen Fang and The Painted Screen: An Exhibition About an Exhibition curated by Professor Wu Hung).

CENTER IN DELHI

The Center in Delhi marked the fifth anniversary of its opening in 2019, with a commemorative event convening UChicago leadership and faculty to India to celebrate with local colleagues in early November 2019. As it has since its founding, the Center continues to be deeply engaged with not only the UChicago community but the academic community across India, frequently partnering with local peers and other high-impact organizations to host public lectures, exhibitions, training programs, information sessions, and social events.

The Center was host to nearly 5,300 attendees across its many activities (both in-person and virtual) during FY20. While the Center closed due to COVID in March 2020, prior to that date it hosted 84 academic events, 16 information sessions, 88 alumni events, and 9 events led by local partner institutions. The Center also facilitated visits to India for UChicago faculty and staff including Bill Brown, Vu Tran, Daniel Raeburn, Rachel DeWoskin, Laura Ring, Alan Thomas, and Maanas Rajhavan. In a unique opportunity, the Center in Delhi is now home to the skull cast of Rajasaurus narmadensis, the first skull assembled of a dinosaur from India, discovered by Professor Paul Sereno.

FCRA Approval

In Summer 2019, after a lengthy review process, the University received FCRA approval for the University of Chicago Trust in India, the charitable entity that supports University initiatives and research in India. The Foreign Contribution (Regulation) Act was passed in India in 2010 to regulate the acceptance and utilization of foreign contributions by certain individuals or companies. This approval means that the Trust can now accept donations from outside of India, thereby more easily supporting a variety of faculty-led initiatives in India.

YUEN CAMPUS IN HONG KONG

In the 2019-2020 academic year, the Yuen Campus in Hong Kong was confronted with the unexpected challenges of widespread social unrest in Hong Kong in the second half of 2019 and the ongoing global COVID-19 pandemic starting in early 2020. Despite these challenges, the Yuen Campus organized 31 academic conferences, workshops, public talks, and virtual events in FY20 with over 2,600 participants. Thirty-two UChicago faculty from 7 units either visited Hong Kong or participated in the Campus’s virtual events. The Campus’s activities also engaged collaborators and invited speakers affiliated with 42 unique departments at universities and institutions around the region. In addition, the Campus building recently picked up its 15th architectural award.

Among the creative opportunities explored during the past year are a new exhibition at the Yuen Campus titled On the Verge of Metropolis: Squatters in Hong Kong, the celebration of the Campus’s first anniversary in November 2019, which celebrated the its impact as a hub for both the UChicago and broader Hong Kong communities; and the Crowdsourcing COVID-19 History Project, which engaged the UChicago community across Asia to document their personal experiences during this time of monumental global change.

Yuen Visiting Scholars

The Yuen Visiting Scholars Program seeds the development of future collaborative activities in Hong Kong and the Greater Bay Area for outstanding University of Chicago faculty. Through this opportunity, Yuen Visiting Scholars travel to Hong Kong, explore deeper connections and sustainable partnerships with institutions in Hong Kong, and act as a resource for local initiatives and institutions, as well as presenting their work to public and targeted audiences.
